

HCI Group Project: Heuristic Evaluation and Design Iteration

Move & Learn: Motor Skills Development App

1. Team Member Participation:

- Alia Rezaee
- Setara Ahmadian
- Mahboba Sakhizada
- Zulaikha Mohammadi

2. Raw Evaluations

HCI Heuristic Evaluation Feedback Form

Game Title: Tap & Match
Evaluator Name (optional): Seta
Date: 3 Aug 2025

Instructions for Evaluators:
Please evaluate the prototype using your game experience. Be specific and constructive. This feedback will help the team improve the prototype in the next iteration.

Nielsen's 10 Usability Heuristics Reference

1. Visibility of System Status
► When you tapped or interacted with a color/ball, was it clear what happened next?
Yes.
► How well did the game show your current progress or status?
It was completely correct.
2. Match Between System and Real World
► Did the game visuals and language feel natural and easy to understand?
Yes, it does.
► Were the actions (like tapping) intuitive or did anything feel confusing?
Just, the subject bar needs to be a bit bigger for better visualizing balls.
3. User Control and Freedom
► Could you easily undo a move or reset the game if needed?
I didn't see it.
► Were you ever stuck or wishing you had more control?
No.
4. Consistency and Standards
► Did the colors and tap behavior work consistently throughout the game?
Yes, it did.
► Did anything behave differently than you expected?
No.
5. Error Prevention
► Did the game help you avoid mistakes (like wrong taps)?
Yes, it did.
► Were there any confusing situations where you accidentally made a wrong move?
No.
6. Recognition Rather Than Recall
► Did the game always show you what actions were available, or did you have to remember steps?
It was available.
► Was it easy to figure out what to do next just by looking?
Yes.
7. Flexibility and Efficiency of Use
► Was the game smooth for both new users and experienced players?
Yes.
► Could you play quickly if you wanted, or did anything slow you down?
I could adjust speed.
8. Aesthetic and Minimalist Design
► Was the design clean and focused, or did anything feel cluttered or unnecessary?
It was clean.
► How did the overall look and feel affect your experience?
It was engaging specially for children or elder I guess.
9. Help Users Recognize, Diagnose, and Recover from Errors
► If something went wrong, did the game clearly explain what happened?
Yes, it did.
10. Help and Documentation
► Did the game provide enough instructions to help you understand how to play and win?
Yes.
► Was anything unclear that could have used more explanation?
No.

General Feedback:
It was very good experience.

HCI Heuristic Evaluation Feedback Form

Game Title: Tap & Match

Evaluator Name (optional): Suchitra Kairi

Date: 8/7/2025

Instructions for Evaluators:

Please evaluate the prototype using your game experience. Be specific and constructive. This feedback will help the team improve the prototype in the next iteration.

Nielsen's 10 Usability Heuristics Reference

1. Visibility of System Status

- When you tapped or interacted with a color/ball, was it clear what happened next?

yes

- How well did the game show your current progress or status?

It shows the status well.

2. Match Between System and Real World

- Did the game visuals and language feel natural and easy to understand?

yes

- Were the actions (like tapping) intuitive or did anything feel confusing?

No

3. User Control and Freedom

- Could you easily undo a move or reset the game if needed?

yes

- Were you ever stuck or wishing you had more control?

No

4. Consistency and Standards

- Did the colors and tap behavior work consistently throughout the game?

yes

- Did anything behave differently than you expected?

No

5. Error Prevention

- Did the game help you avoid mistakes (like wrong taps)?

yes

- Were there any confusing situations where you accidentally made a wrong move?

No

6. Recognition Rather Than Recall

- Did the game always show you what actions were available, or did you have to remember steps?

No need to remember.

- Was it easy to figure out what to do next just by looking?

yes

7. Flexibility and Efficiency of Use

- Was the game smooth for both new users and experienced players?

yes

- Could you play quickly if you wanted, or did anything slow you down?

There is options for speed. So, it's easy to change the speed.

8. Aesthetic and Minimalist Design

- Was the design clean and focused, or did anything feel cluttered or unnecessary?

No

- How did the overall look and feel affect your experience?

I like it.

9. Help Users Recognize, Diagnose, and Recover from Errors

- If something went wrong, did the game clearly explain what happened?

yes

- Were you able to fix or recover from errors easily?

yes

10. Help and Documentation

- Did the game provide enough instructions to help you understand how to play and win?

yes

- Was anything unclear that could have used more explanation?

No

General Feedback: I do not think there
is any issues. I like it.

Game Title: Tap & Match

Evaluator Name (optional): Faiza

Date: 8/4/2025

Instructions for Evaluators:

Please evaluate the prototype using your game experience. Be specific and constructive. This feedback will help the team improve the prototype in the next iteration.

Nielsen's 10 Usability Heuristics Reference

1. Visibility of System Status

- When you tapped or interacted with a color/ball, was it clear what happened next?

yes

- How well did the game show your current progress or status?

pretty fine

2. Match Between System and Real World

- Did the game visuals and language feel natural and easy to understand?

yes

- Were the actions (like tapping) intuitive or did anything feel confusing?

no

3. User Control and Freedom

- Could you easily undo a move or reset the game if needed?

no

- Were you ever stuck or wishing you had more control?

undo option

4. Consistency and Standards

- Did the colors and tap behavior work consistently throughout the game?

yes

- Did anything behave differently than you expected?

no

5. Error Prevention

- Did the game help you avoid mistakes (like wrong taps)?

no

- Were there any confusing situations where you accidentally made a wrong move?

no

6. Recognition Rather Than Recall

- Did the game always show you what actions were available, or did you have to remember steps?

no

- Was it easy to figure out what to do next just by looking?

yes

7. Flexibility and Efficiency of Use

- Was the game smooth for both new users and experienced players?

I think yes

- Could you play quickly if you wanted, or did anything slow you down?

~~the balloons were coming slow~~

no

8. Aesthetic and Minimalist Design

- Was the design clean and focused, or did anything feel cluttered or unnecessary?

yes it is good

- How did the overall look and feel affect your experience?

better

9. Help Users Recognize, Diagnose, and Recover from Errors

- If something went wrong, did the game clearly explain what happened?

yes

- Were you able to fix or recover from errors easily?

no

10. Help and Documentation

- Did the game provide enough instructions to help you understand how to play and win?

yes

- Was anything unclear that could have used more explanation?

I think so good

Game Title: Tap & Match

Evaluator Name (optional): Nasaba

Date: 9/8/2025

Instructions for Evaluators:

Please evaluate the prototype using your game experience. Be specific and constructive. This feedback will help the team improve the prototype in the next iteration.

Nielsen's 10 Usability Heuristics Reference

1. Visibility of System Status

- When you tapped or interacted with a color/ball, was it clear what happened next?

Yes

- How well did the game show your current progress or status?

Pretty good

2. Match Between System and Real World

- Did the game visuals and language feel natural and easy to understand?

Yes

- Were the actions (like tapping) intuitive or did anything feel confusing?

Not really

3. User Control and Freedom

- Could you easily undo a move or reset the game if needed?

There was a pause option but not a reset option

- Were you ever stuck or wishing you had more control?

Not really

4. Consistency and Standards

- Did the colors and tap behavior work consistently throughout the game?

Yes

- Did anything behave differently than you expected?

No

5. Error Prevention

- Did the game help you avoid mistakes (like wrong taps)?

Yes

- Were there any confusing situations where you accidentally made a wrong move?

Not really

6. Recognition Rather Than Recall

- Did the game always show you what actions were available, or did you have to remember steps?

No it was clear what actions were available

- Was it easy to figure out what to do next just by looking?

Yes

7. Flexibility and Efficiency of Use

- Was the game smooth for both new users and experienced players?

Yes

- Could you play quickly if you wanted, or did anything slow you down?

Yes I wish the speed of balloons increased or could be controlled

8. Aesthetic and Minimalist Design

- Was the design clean and focused, or did anything feel cluttered or unnecessary?

No it was neat

- How did the overall look and feel affect your experience?

It was very minimalist and easy user friendly

9. Help Users Recognize, Diagnose, and Recover from Errors

- If something went wrong, did the game clearly explain what happened?

Yes

- Were you able to fix or recover from errors easily?

Yes

10. Help and Documentation

- Did the game provide enough instructions to help you understand how to play and win?

Yes

- Was anything unclear that could have used more explanation?

No

General Feedback:

3. Heuristic Evaluation Summary and Response Table:

Issue #	Description of the Issue	Heuristic Violated	Severity	Action Taken	Justification
01	No undo Option	User control and freedom	1	None	We don't need an undo option because every level is very short.
02	Bigger subject bar	Match between the system and the real world	1	None	We need more space for the balloons to move around
03	No recovery from errors	Help the user recognize, diagnose, and recover from errors	0	None	There are not many errors the user can make in this game.
