

## HEURISTIC EVALUATION TEAM MEETING REPORT

**Project/Group Name:** Move & Learn: Motor Skills Development App

**Meeting Date:** 03/08/2025

**Meeting #:** 05

**Meeting Location / Platform:** Room 401

**Meeting Type:** ☒ Progress Update ☐ Planning ☐ Review ☐ Other: \_\_\_\_\_

### Attendance

| Members            | Present | Absent | Guests |
|--------------------|---------|--------|--------|
| Setara Ahmadian    | ✓       |        |        |
| Alia Rezae         | ✓       |        |        |
| Mahboba Sakhizada  | ✓       |        |        |
| Zulaikha Mohammadi | ✓       |        |        |

### Meeting Objectives

1. Conduct a heuristic evaluation of the app prototype focusing on usability and accessibility.
2. Identify usability issues based on established design principles.
3. Prioritize problems to address in the next iteration of the prototype.

### Meeting Summary

#### Key Discussions

- Evaluated the prototype against Nielsen's 10 usability heuristics (e.g., visibility of system status, user control and freedom, error prevention).
- Discussed accessibility features including adaptive speed, clear visual feedback, simplicity of navigation, and large target areas for easy touch.
- Highlighted several usability issues such as unclear button labels, inconsistent feedback sounds, and challenges with gesture controls for some motor impairments.
- Proposed solutions including clearer button texts, more flexible gesture options, and optional tutorial/help screens.

#### Decisions Made

- Prioritize fixing the most critical usability problems in the next prototype update.
- Include additional user feedback sessions focusing on identified problem areas after fixes.

## Action Items

| Task                                           | Owner              | Priority | Deadline   | Status      | Notes                                      |
|------------------------------------------------|--------------------|----------|------------|-------------|--------------------------------------------|
| Write user personas based on observations      | Setara Ahmadian    | High     | 03/08/2025 | Done        | Use feedback from all team members         |
| Propose design changes to address key issues   | Alia Rezae         | High     | 03/08/2025 | Done        | Focus on button labels, feedback, gestures |
| Update prototype incorporating heuristic fixes | Mahboba Sakhizada  | High     | 03/08/2025 | Done        | Test changes for improved usability        |
| Plan follow-up user testing session post-fixes | Zulaikha Mohammadi | Medium   | 03/08/2025 | In Progress | Focus on previously identified issues      |

## Next Meeting

**Date:** 04/08/2025

**Time:** 8 PM

**Location/Platform:** Room 401

## Agenda Items:

1. Conduct user testing of the app prototype with target users (children with arm coordination, caregivers, and therapists if possible).
2. Collect and discuss feedback regarding the app's navigation, engagement, adaptability, and accessibility.
3. Identify any user difficulties or issues encountered during testing.
4. Plan necessary adjustments and improvements based on user feedback.

## Additional Notes:

- Use simple, clear tasks during testing to observe user interaction effectively.
- Aim to test with at least 2-3 users to gather meaningful insights.
- Ensure testing considers accessibility needs for users with motor impairments.

**Prepared By:** Setara Ahmadian

**Approved By:** Alia Rezae
